Gender and Green Governance

The Political Economy of Women's Presence
Within and Beyond Community Forestry

BINA AGARWAL

About the Book

Economists studying environmental collective action and green governance have paid little attention to the question of gender. Research on gender and green governance in other disciplines has focused mainly on women's near absence from forestry institutions. This interdisciplinary book turns that focus on its head to ask: what if women were present in these institutions? What difference would *that* make?

Would women's inclusion in forest governance – undeniably important for equity – also affect decisions on forest use and outcomes for conservation and subsistence? Are women's interests in forests different from men's? Would women's presence lead to better forests and more equitable access? Does it matter which class of women governs? And how large a presence of women would make an impact? Answers to these questions can prove foundational for effective environmental governance. Yet they have been subject to little empirical investigation.

In an analysis that is conceptually sophisticated and statistically rigorous, using primary data on community forestry institutions in India and Nepal, this book is the first major study to comprehensively address these wide-ranging issues. It traces women's history of exclusion from public institutions, the factors which constrain their effective participation, and how those constraints can be overcome. It outlines how strategic partnerships between forestry groups and other civil society institutions could strengthen rural women's bargaining power with community and government. And it examines the complexities of eliciting government accountability in addressing poor rural women's needs, such as for clean domestic fuel and access to the commons.

Located in the interface of environmental studies, political economy and gender analysis, the volume makes significant original contributions to current debates on gender and governance, forest conservation, clean energy policy, critical mass and social inclusion. Traversing uncharted territory with rare analytical rigor, this lucidly written book will be of interest to scholars and students as well as policy makers and practitioners.

About the Author

Bina Agarwal is Director and Professor of Economics, Institute of Economic Growth, University of Delhi, India.

'Bina Agarwal has crafted a book of central importance in today's world. Both women and their connections with forests have been under-represented in the field, in academic research, and in policy. With analytical rigour and originality, Agarwal bridges these major gaps in our understanding of the difference women can make, when they are actively involved in forest governance.'

— **ELINOR OSTROM**, Nobel Laureate in Economics 2009

'Beautifully written and soundly argued, this book makes an outstanding contribution to the fields of both environmental economics and governance. Drawing on over a decade of fieldwork in India and Nepal, and eschewing easy generalizations, Bina Agarwal offers a richly layered and insightful treatment of the effects of women's presence in local bodies governing village forests.'

— **JEAN-PHILIPPE PLATTEAU**, University of Namur and co-author of *Halting Degradation of Natural Resources*

Oxford University Press is a department of the University of Oxford. It furthers the University's objective of excellence in research, scholarship, and education by publishing worldwide.
